

**Le Tableautier**  
L'expert en fabrication des armoires électriques

**Conception, Manufacture and Sale of Low Voltage Electrical  
Cabinets for Distribution, Regulation and Automation**

**Establishment's year : 2011**

**Legal Status : SARL**

Since 2011, Le Tableautier is characterized by the quality and hegemony in the field of **coding, studying, design, manufacture** and **sale** of low voltage electrical panels for **distribution, regulation** and **automation**.

To do this, the company has a modern production center guaranteeing control of all these processes, namely:

## Coding

## Dimensioning & Positioning

## Test & Essay

## Conception

## Wiring

## Packaging

**Le Tableautier**, conception, manufacture and sale of Low Voltage electrical cabinets for distribution, regulation and automation.

Its management system is well-designed and oriented towards listening, customer satisfaction and generating a continuous improvement process that unites product and service compliance and respect for deadlines.

Partner of major brands such as **Schneider, Legrand, Hager, GE, ABB, Socomec** et **EATON**, etc., we offer the manufacture of electrical cabinets with equipment from different brands in order to offer you the best of each manufacturer and the equipment best suited to your needs.

Our company **Le Tableautier**, aware of the evolutions and the requirements relating to the quality of its services, has started the project of the implementation of the ISO 9001V 2015 standard.

## Production Site:

The installation and control of your electrical panels are carried out by our highly qualified technicians on our production site.

**Le Tableautier's** factory is located in Jabeur Ibn Hayen Street, Bhar Lazreg 2078 - La Marsa about 21.5 Km from Tunis.

## Ressources:

### Human Capital :

Le Tableautier's products and services are provided by a team of engineers, supervisors and specialized technicians with profiles adapted to the company's objectives in terms of customer satisfaction and continuous improvement in the services provided.

### Design Office:

The design office monitors the execution of the work until the commissioning of the production tool.

- ✦ Distribution study
- ✦ Dimensioning
- ✦ Power Budget
- ✦ Installation architecture
- ✦ Technical assistance
- ✦ Electrical compliance study
- ✦ Put into operation

### Wiring Workshop :

**Le Tableautier** cables industrial electrical cabinets in small and medium series / TGBT / boxes / consoles and control command cabinets, distribution and all other achievements specific to the trade of the panel builder.

The company accompanies the project, from the study to the commissioning on site.

All cabinets are tested following a rigorous quality procedure:

- Any custom brand
- Cabinet architecture
- Busbars up to 3200 A
- Commissioning

### Automation :

Our office supports the automation of your production tool from its pre-study. It intervenes at any stage of the work:

- Design
- Integration
- Determination of operations to be automated
- Functional and organic analyzes
- Programming
- Commissioning
- Maintenance

### Technical Resources :

#### Computer Equipment :

Our IT resources are divided to four types: :

#### 1) Electrical design softwares:

#### 2) Office softwares

#### 3) Administrative, commercial, production, purchasing softwares :

**Deluxe**

#### 4) Internet network

#### Control equipment :

We are committed to product quality in accordance with the IEC 61439-1 standard.

During the manufacturing of sub-assemblies or products, a **self-check** is carried out by our technicians also controlled thanks to our documentary system.

A **final control** and validation is carried out according to customer requirements and technical specifications with the possibility of providing a report.

# Market and Economic Environment

## STRATEGY :
